ABSTRACT

Enrollment increases in the seven colleges in the Hawaii community college system appear to have stabilized. Although enrollment increased by 1% in fall 1976 over fall 1975, some colleges reported decreases. Of the total fall 1976 enrollment of 27,829, 75% were regular students, compared to 66% the previous year. For the fourth consecutive year, students were taking fewer semester hours (from 11.0 in fall 1975 to 10.8 in fall 1976). For the same four-year period there has been a proportional decrease in full-time students and an increase in part-time students. Males continued to outnumber females (55% to 45%). Mean age dropped from 25.0 years in fall 1975 to 24.7 years in fall 1976, but the modal group was the 18-19 age category. The proportion of continuing students increased at all but one campus; proportionately fewer (32%) new students enrolled, and the proportion of transfer students remained the same (12%). Distributions of students in liberal arts (48%) and vocational (44%) programs were similar to those reported in fall 1975. (JDS)

SELECTED CHARACTERISTICS
CLASSIFIED & UNCLASSIFIED (REGULAR) STUDENTS
COMMUNITY COLLEGES
FALL 1976

The challenge facing today's community colleges is to provide an educational option for students who come to college with different backgrounds and objectives--senior citizens, college transfers, vocational students, handicapped students, military, apprentices, high school early admits and other special students. Enrollment data and student characteristics are essential for the development of plans to meet these students' needs.

As in past enrollment reports, the emphasis of this report is on the regular students. However, a count of the early admits, concurrent students and other special students is included since these students do affect a college's resources.

Selected data and characteristics are included in the main body of this report. Additional information on student majors by college appears in the apperdices.

Sources of Data

Except for Table I, the data for this report have been extracted from the Student Enrollment Reports (SER) as of October 15, 1976. These reports are generated from registration, applications and personal history forms.

Highlights

1. Total Registrations (Table I): Regular students (20,879) comprise 75% of the total registrations (27,829) in Community College programs compared to 66% last fall. The enrollment of 274 early admits and 227 concurrent students shows declines of 4% and 17%, respectively.

2. Regular Students (Tables II, III, IV): The enrollment of 20,879 is 1% greater than the fall 1975 enrollment of 20,617 for the system. Increases at some colleges have been offset by decreases at others: Honolulu CC (+11%), Kapiolani CC (+6%), Maui CC (+5%), Leeward CC (-7%), Kauai CC (-5%). Admissions & Records personnel at the various campuses have surmised that the decreases in enrollment are largely due to the non-attendance by veterans whose benefits ceased this fall.

   Sex: Males continue to outnumber females. This margin (55%) is smaller than last fall (57%).

   Mean Age: 24.7 years as compared to last fall's mean age of 25.0 years. The range is from 22.5 at Kapiolani CC to 26.2 at Windward CC.

JC 760 618

Age Distribution: As in previous semesters, the modal group is the 18-19 age category. The range for this group is from 26% at Kauai CC to 38% at Hawaii CC and Kapiolani CC. There are 171 students who are 60+ years of age, about 30 more than last fall. Most of these older students are at Honolulu (76) and Leeward (36).

Males outnumber females in all age groups except in the under 18, 18-19 and 60+ categories. Males outnumber females 2 to 1 in the 25-29 age group.

Distribution by Program: Proportionately more students are in the Liberal Arts (48%) program than in Vocational (44%) programs. These percentages are similar to those reported last fall. Occupational Safety and Health is the only program with 50% or more increase in majors.

Semester Hours Taken: Students are taking fewer semester hours on the average: from 11.0 last fall to 10.8 this fall. This decrease has been consistent for the past four years: 1973 (11.5), 1974 (11.3), 1975 (11.0), and 1975 (10.8). For the same four-year period there has been a proportional decrease in the number of full-time students and an increase in the number of part-time students.

Student Status: The proportion of continuing students has increased at every campus except at Kapiolani CC. There are proportionately fewer new students enrolled this fall (30%) as compared to last fall (32%).

The proportion of transfer students is the same as last fall (12%). 1,492 students transferred from within the University of Hawaii System.

High School Background: 3,552 (26%) of the 1976 Hawaii high school graduates are enrolled at the community colleges. This is comparable to last year's 3,628 (27%) high school graduates.

Summary

The enrollment increases at the community colleges have stabilized compared to the previous years. Students are still more likely to be older, liberal arts majors, unmarried males, but are taking fewer semester hours.

What factors account for the "stabilized" enrollment this fall? What implications does this condition have for planning of curricula, physical facilities and student services?
